

KAMUZU UNIVERSITY
OF HEALTH SCIENCES

PRESS RELEASE

1ST JULY 2026

NOTICE OF ANNUAL TUITION FEE ADJUSTMENT

Kamuzu University of Health Sciences (KUHeS) wishes to inform all students, parents, guardians, and the general public that during its 15th Ordinary Meeting held on 26 March 2026, the University Council approved a revision of annual tuition fees for generic undergraduate students following a recommendation from the University Senate.

Effective **next academic year, 2027/2028** the annual tuition fee for generic undergraduate students will increase from **K1,000,000.00** to **K2,000,000.00**.

In making this decision, KUHeS Council noted that tuition fees for generic undergraduate students were last reviewed in **2023**. Since then, the operating environment has significantly changed making the current fee structure unsustainable.

The review was informed by several factors, including:

- i. The need to align student financial contributions more closely with the actual cost of providing quality university education and training.
- ii. The significant increase in the cost of teaching and learning due to persistent inflation, the depreciation of the Malawi Kwacha, and rising operational expenses

The University further wishes to clarify that this announcement applies **only to generic undergraduate students**. Revised tuition fees for other student categories will be communicated separately after the relevant approval processes have been concluded.

KUHeS appreciates the continued support and understanding of students, parents, guardians, and all stakeholders as the University works to fulfil its mandate of producing highly qualified health professionals through excellence in education, research, innovation, and service.
